REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 13, 22 among other things teach the limitations "at least two active server processes, including a first server process and second server process, each on a different cluster configured to be a domain server, where each process has a list of agent processes within the domain that are registered with that server process, that handle tasks sent from the browser to that server process to a registered agent to perform the task; wherein the server system comprises two clusters; and where the clusters are aware of the first and second processes; and each agent process at the cluster is registered with a server process and paired to complete tasks issued by the browser; and wherein the first and second agent/server pairs continues processing in the event of a failure of a agent/server pair" as a system, a method, and an article of manufacture in a computer network environment.

The prior art does not teach the cited limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
